

GUIDELINES FOR EMBRACING AI INTO TEACHING AND LEARNING

Student Version

Campaign Name

Embracing AI

Prepared By

Dean's AI Task Force

Date

May 30, 2024

Introduction

Generative artificial intelligence (Gen AI) tools such as ChatGPT, Bard, Scribe and so on, are capable of promptly generating text, images, audio, and so forth by analyzing the patterns of their training data. The utilization of Gen AI tools has also massively impacted education. In response to the rapidly evolving AI landscape and the transformative potential offered by different AI technologies in education, the Toronto Business College (TBC) acknowledges the value of integrating these tools and techniques for educational purposes among its community. TBC also recognizes the urgent need to prepare the students with these tools for their job readiness. However, it emphasizes the ethical and responsible use of AI technologies for integrity, privacy, and equity reasons. In view of this, TBC has developed robust guidelines to balance the benefits afforded by AI with academic integrity. TBC is committed to supporting instructors and students in integrating Gen AI into educational activities, emphasizing critical thinking.

Guidelines for Students

Can Students Use Gen AI in Their Course?

Students should review the Course Announcement and assessment instructions carefully and adhere to the guidance provided by the instructor. It’s important to note that the Academic Integrity policy applies to all student activities. Unauthorized usage of Gen AI tool in assessments will result in Academic Integrity issues and an ADR will be filed.

Citation of the Content Generated by Gen AI

You must specify the date (year/month/day) of using Gen AI tool to generate respective content to create the accurate citation. Considering that the training data for Gen AI tools is periodically updated, a specific date provides accurate information about the time period from which the data source originates.

In-text Citation	(OpenAI, 2023)
Reference List	OpenAI. (2023). ChatGPT (Mar 14 version) [Large language model].
Acknowledge the utilization of Gen AI	I acknowledge the use of ChatGPT (https://chat.openai.com/) and/or Grammarly (https://www.grammarly.com/) to correct grammars and improve writing in this assessment. I entered the following prompts on [insert date]: Insert prompt.

Note: Gen AI tools generate content based on existing information sources, which may include inaccuracies and/or biased information. Students should verify the accuracy of the generated work.

AI Literacy

Gen AI tools offer valuable support to educators and students in numerous ways and continue to evolve and improve. However, there are still limitations and concerns regarding their use, including potential biases, inaccuracies, and ethical issues. Enhancing AI literacy helps students and faculty members understand and critically use the technology more effectively, as well as with a critical-thinking approach.

Accuracy	Gen AI might generate false information with a logical and informative tone. It is crucial to cross verify AI-generated content.
Bias	There is a possibility that information generated by Gen AI tool is biased due to the existing data in the pool.
Data Privacy/Security Concerns	Concerns of data privacy and security have been raised due to the enormous amount of data that AI has collected
