PROGRAM LEARNING OBJECTIVES

WELCOME

TO THE COMPUTER SOFTWARE AND DATABASE DEVELOPMENT PROGRAM

If you are serious about pursuing a career in Cloud Computing, you've made the right choice in selecting Loyalist College. Our faculty works alongside you to aid in your success for wherever your career path may lead.

The intention of this program manual is to:

1. Explain the full range of services we offer in the Computer Science and Database Development program to support your success;
2. Highlight the program's assortment of courses and learning experiences; and,
3. Clarify our expectations of you, and your expectations of us.

REQUIRED LAPTOP SPECIFICATIONS

We recommend that each student have a personal laptop. Students have access to all software that is part of their program of study on their personal computer. This tool will allow you to take advantage of your learning anywhere and at any time. Below are the suggested minimum standards for your device:

Minimum Requirements:

RAM: 8 GB
CPU: i5 Intel processor
HDD: 512 GB HDD

Recommended Requirements:

RAM: 16 GB
CPU: i7 Intel processor
HDD: 256 GB SSD or 512 GB HDD

To access Moodle, recover your password, connect to the network, or accessing Microsoft Office, please contact IT Support at itsupport@tbcollege.com.

HOURS OF OPERATION

Student Access Lab in the Library

Hours of Operation during the Academic Year*

- Monday to Saturday: 8 am – 9 pm
- Closed on Sundays and statutory holidays

HOW TO CONTACT US

College staff can be reached in person, by phone, or email through the contact information listed within the Program Contacts section of this program manual. Please note that all email communication must be sent and received through your Loyalist College email account.

Students are responsible for regularly checking their Loyalist email account and Learning Management System (LMS) for communication from faculty regarding program or course-specific information.

STUDENT SERVICES

Student Success is the central point of access to many of the services available to support your academic success. Services include program advising and guidance, accessible academic accommodations, personal counselling, peer tutoring, writing support, and culturally responsive services for Indigenous and international students. Staff can also help you navigate College policies, explore bursary and grant options, provide referrals, and partner with you in seeking solutions.

STUDENT RESPONSIBILITIES – REGISTRATION AND ACCOUNT

Please note: Program and course-specific requirements are subject to change. It is each student's responsibility to ensure they are registered in the appropriate course to fulfill the requirements of their program and to be aware of all applicable progression requirements.

Students must ensure that they are registered in all courses they are attending, and that courses which they are not attending are removed from their academic record. It is the student's responsibility to ensure their registration record and course schedule is accurate prior to the registration and withdrawal deadlines noted on the [Academic Calendar](#).

Students are responsible for remaining in good financial standing and resolving all holds placed on their account.

Please contact Enrollment Services with any questions or concerns regarding course enrollment, graduation, group selection, updating academic progression, payment and fees. Enrollment Services can be reached at registration@tbcollege.com Regular office hours are Monday to Friday 8 am to 5 pm.

All Human Rights Code related requests for accommodation will be given meaningful consideration.

PROGRAM POLICIES AND PROCEDURES

RIGHTS AND RESPONSIBILITIES

All faculty and staff have the right to:

- An educational environment free of racist or sexist stereotyping, discrimination or harassment in the classroom (either physical or virtual) and in all College service areas.
- Expect appropriate student behaviour and have the right to request that a student exhibiting disruptive and/or disrespectful behaviour leave the classroom, laboratory or practicum area.
- Expect to be informed immediately of any issues, problems or concerns related to the program.

All faculty are required to:

- Provide written course documentation at the beginning of each course which includes outcomes, objectives, methodology, required resources, an evaluation system and penalties applied if expectations or due dates are not met.
- Provide notice in writing of any substantial changes to course requirements and the reason(s) for these changes.
- Set deadlines for assigned work, to expect assignments to be submitted at specific times and to impose equitable, established penalties when students fail to meet the deadlines or expectations.
- Carry out regularly scheduled instruction, and provide academic counselling for students at other times.

LOYALIST'S VIOLENCE PREVENTION POLICY

- All College members have a responsibility to

foster a climate of respect and safety, free from violent behavior and harassment.

- Violence (physical violence, threatening actions or harassment) is not, in any way, acceptable behaviour.
- Weapons or replicas of weapons are not permitted on Loyalist College property.
- Unacceptable behaviour will result in disciplinary action or appropriate sanctions.
- More information can be found in the [Student Code of Conduct – Positive Learning & Living Environment \(AOP 209\)](#).

ATTENDANCE

Each faculty member has different expectations regarding attendance, but we all agree that there is a direct relationship between academic success and attendance in class. You can demonstrate your commitment to your chosen profession by attending all your classes. The skills and knowledge that you will acquire in the program build upon each other. Class discussions and team projects are a key part of your learning journey. It is the student's responsibility to inform the faculty member (by email) of their absence before the beginning of class.

CLASSROOM EXPECTATIONS

In business, time is money. You are paying to attend class and if you play an active role, you will receive the best value for your tuition. Professional attitudes are developed in class by:

- **Demonstrating respect for self, others and your environment.**
- **Turning off your cellphone.**

- **Refraining from texting.**
- **Refraining from watching movies and YouTube.**
- **Being engaged in the class and encouraging others to do the same.**

Here are some examples of inappropriate and unethical behaviour:

Cheating: transferring or receiving information without the permission of the faculty member for the purpose of achieving grades. This includes copying from the work of another person or permitting such copying to take place during a test or using unauthorized notes or other memory aides.

Plagiarism: submitting work that is substantially copied from the work of another person and representing that work as original.

Falsification: modifying an examination paper, record, or assignment for the purpose of obtaining additional credits or a higher grade.

Misrepresentation: knowingly giving false information about facts or actions in order to gain admission to the College or to fulfill academic requirements.

Fraudulent Behaviour: knowingly misleading another person for purposes of gain and thereby causing actual harm to another person or assisting in such activity.

PLAGIARISM AND ACADEMIC DISHONESTY

Plagiarism is the act of collecting and passing off the writing, passages or ideas of another author as your own. Students are plagiarizing if they fail to give credit, through referencing, to the person or work that originated the idea or reference.

Following a discussion with faculty, a mandatory failing grade will be issued on the assignment. A failing grade is the minimum penalty, but the College may reserve the right to impose a full range of sanctions including suspension or expulsion.

Academic dishonesty is obtaining academic grades by deceit. This includes the use of concealed notes or materials during a test/examination, acquiring information from other students by looking at their test papers, talking/signaling other students during tests, or by using another person's work in any form without citing

references appropriately.

A student found guilty of obtaining grades in this manner will automatically be assigned a zero for the test/exam. A repeat offence may result in suspension from the program.

Please see the [Academic Integrity Policy \(AOP 216\)](#) for more information.

PRIOR LEARNING ASSESSMENT AND RECOGNITION (PLAR)

PLAR is a process that involves the identification, documentation, assessment and recognition of learning acquired through informal means. This may include work and life experience, informal education and training, independent study, volunteering, travel, hobbies and family experiences.

Students with significant life or work experience can request the opportunity to PLAR an academic course if they feel they have acquired most or all of the learning outcomes of the course from experiences elsewhere. A fee will be charged per course for assessment of prior learning (please refer to current College fee structure) and students may not PLAR more than 75% of program requirements.

Please see the [Prior Learning Assessment and Recognition, Transfer Credit, Articulation and Exemption Policy \(AOP 221\)](#) for more information.

TRANSFER/ARTICULATION AGREEMENTS

Explore [transfer credit options and articulation agreements](#).

CO-OP INFORMATION

Industry co-op allows the student to gain professional experience in the related field prior to graduation and it is organized and planned by the student with support from the faculty.

A co-op work term in semester four provides an opportunity to gain first-hand workplace experience in the industry.

CO-OP PLACEMENT

Co-op is a work integrated experience built into post-secondary programs to allow you to get hands on experience in your field of study while applying your academic studies. The integration of formal learning practices with developmental learning opportunities helps to enhance and consolidate the knowledge, skills, abilities, and behaviours of emerging professionals. This is also an opportunity to interact and demonstrate your skills to potential employers.

APPLIED INDUSTRY PROJECT

Under extraordinary circumstances some students are not eligible for Co-op and may be able to complete the Applied Industry Project. Students wishing to pursue the Applied Industry Project must seek approval from:

Florian Vauleon

Director of Academics & Quality Assurance
Room 109, Ext. 275
florian.vauleon@tbcollege.com

Applied Industry Project involves a simulation experience involving the integration of formal learning practices with developmental learning opportunities helps to enhance and consolidate the knowledge, skills, abilities, and behaviours of emerging professionals. The industry project will be performed on the College campus under the guidance of the College faculty. Students will attend college five days weekly.

GUIDE TO SAFETY DURING PLACEMENT

Basic steps in risk awareness:

- Identify potential risks. Talk to your faculty supervisor and placement supervisor about risk related to your field.
- Understand the guidelines/expectations from the College and placement host.
- Inform your faculty supervisor or placement supervisor of any concerns.

Should an incident occur:

- Be sure to document all facts such as date, time, persons involved and the situation as you observed it.
- Inform your faculty supervisor or placement supervisor immediately.

EXAMPLES OF SAFETY RISKS

Harassment

- Sexual, age, ethnic, racial, or disability harassment of student workers or any employee is illegal.
- The employer must ensure that current full-time employees or interns do not harass student workers.
- Immediately report any harassment to your faculty supervisor.
- Resolution may include placing the student in another position.
- Harassment of others in the workplace may result in your dismissal from the program.

Protect Your Personal Identity

- Protect Social Insurance Number, cellphone numbers and all other personal identification.

Sexual Assault

There are several ways to reduce the risk of becoming a victim of sexual assault:

- Set limits; don't send the wrong message.
- Use your better judgment about situations to avoid.
- Be clear and responsible in your communication with others.
- If necessary, be forceful, firm and assertive in your communication with others.
- Be aware of nonverbal cues that can alert you to a problem. Remember, silence is not consent.
- Don't assume the other person knows what you do or do not want.
- Use the buddy system.
- Avoid secluded places.
- Devise an action plan in advance for what you will do if confronted with a situation of possible sexual assault. Remove yourself from the situation at the first sign that you are feeling unsafe.
- Familiarize yourself with the idea that you might have to be aggressive or yell to remove yourself from a possible sexual assault situation.

Travel

- Consider dangerous intersections, streets, or stretches of highway to and from the site
- Notice parking garages or poorly-lit parking areas
- When using your car or a vehicle provided to you by your placement site, find out all policies regarding travel such as:
 - Reimbursement of funds personally expended.
 - Transporting clients.
 - Transporting sensitive or easily-damaged materials.
 - Transporting potentially hazardous materials.

Physical Hazards

- Working outdoors – sun, snow and ice and other extreme weather, pollution, power-lines, pipelines, electromagnetic radiation, or gas leaks.

- Working indoors – any type of machinery, or unsuitable working conditions such as extreme temperatures, asbestos, sick building odors, buildings with structural concerns, or blocked fire escapes

Biological Hazards

- Animals you may work with (deceased or living).
- Poisonous plants.
- Diseased birds or fish.

If in the medical field, check to see how bio-hazardous waste is disposed (e.g. sharp container).

Chemical Hazards

- Water supply.
- Toner powders from laser printer cartridges or photocopies that may cause eye or lung irritation.
- Chemicals in a laboratory setting getting in eyes, open sores, or lungs.

PROGRAM LEARNING OBJECTIVES

COMPUTER SOFTWARE AND DATABASE DEVELOPMENT

Two-Year Post-Graduate Certificate

At the end of the program, students will be able to:

1. Develop and implement cyber security solutions considering requirements analysis to protect the organization from internal and external threats.
2. Implement and evaluate security solutions for business processes, applications and communications to protect business resources and respond to the needs of all the internal stakeholders.
3. Recommend security controls for the maintenance and deployment of cyber security solutions to protect systems and information.
4. Evaluate and recommend defensive programming and cyber security strategies that protect organizational processes and applications.
5. Design and implement cyber security solutions in compliance with the current security policies, ethical standards, and industry regulations.
6. Plan, implement, and evaluate cyber security policies and strategies using project management principles to effectively respond to the needs of the organization's information security requirements.
7. Optimize the effectiveness of the information security in a business environment through risk mitigation and auditing of information systems.
8. Communicate security policies and audit results and related documentation to any level of the organization.
9. Design and implement vulnerability assessment procedures to find and solve existing security issues in a network through monitoring and analyzing different attackers' tactics, strategies and techniques.

SMALL GIVES US THE POWER TO DO BIG THINGS

In a world obsessed with big, we are small. Small gives us the power to do big things.

And things that make a big difference to our students, community, and partners.

In an impersonal world of big lecture halls and stadium seating, we know our students by name and circumstance. Small frees us to provide personal one-on-one attention, in small classes and learning environments.

Small means our students feel like they matter. That they belong. That they are no longer invisible in a world which had passed them by.

Small means that we can move mountains to help every student succeed, confident in who they are and what they are capable of becoming.

We are Loyalist College of Applied Arts and Technology.

We are small.

PROGRAM LEARNING OBJECTIVES

WELCOME

TO THE COMPUTER SYSTEMS TECHNICIAN PROGRAM

Soon after the creation of the first personal computer, it became apparent that having computers connected together would not only be convenient, but essential.

ARPANET or the Advanced Research Projects Agency Network (a military undertaking) come into being in the late 1960s. As the story goes, the first message ever from the Stanford Research Institute (SRI) sent over a network was “LO”. This was reportedly an attempt by student Charles Kline to LOGIN, however the system crashed and all that was transmitted was the first two characters. Today networks span the globe and provide connectivity for millions of people. It would be unthinkable to have a computing device, be it a home PC, or your smartphone, that was not connected to a network.

Welcome aboard as we explore the modern networking world and prepare you for a future in the industry. You will not only be supporting the inherent technology, but also functioning as a key player in delivering enhanced reliability.

PROGRAM LEARNING OBJECTIVES

COMPUTER SYSTEMS TECHNICIAN

Two-year Ontario College Diploma

1. Identify, analyze, develop, implement, verify and document the requirements for a computing environment.
2. Contribute to the diagnostics, troubleshooting, documenting and monitoring of technical problems using appropriate methodologies and tools.
3. Implement and maintain secure computing environments.
4. Implement robust computing system solutions through validation testing that aligns with industry best practices.
5. Communicate and collaborate with team members and stakeholders to ensure effective working relationships.
6. Select and apply strategies for personal and professional development to enhance work performance.
7. Apply project management principles and tools when working on projects within a computing environment.
8. Adhere to ethical, legal, and regulatory requirements and/or principles in the development and management of computing solutions and systems.
9. Assist with the implementation of computer systems and cloud solutions.
10. Install, configure, troubleshoot, maintain, upgrade and decommission computing system infrastructures.
11. Automate routine tasks using scripting tools and programming languages.
12. Install and monitor a database management system in response to specified requirements.
13. Provide technical support for computing system infrastructures that aligns with industry best practice.

PROGRAM LEARNING OBJECTIVES

WELCOME

TO THE THE CYBER SECURITY PROGRAM

If you are serious about pursuing a career in Cyber Security you've made the right choice in selecting Loyalist College. Our faculty works alongside you to aid in your success for wherever your career path may lead.

The intention of this program manual is to:

1. Explain the full range of services we offer in the Cyber Security program to support your success;
2. Highlight the program's assortment of courses and learning experiences; and,
3. Clarify our expectations of you, and your expectations of us.

WHY CHOOSE CYBER SECURITY?

Gain the knowledge and in-demand skills needed to become an industry-ready IT security professional. Graduates of this program will be equipped to help organizations prevent fraud, data breaches and other vulnerabilities.

Cyber security professionals are in high demand and find careers working in a range of sectors, including computer systems design, financial institutions, public administration and government departments.

Develop essential skills in the following:

- Security
- Network management
- Analysis
- Programming
- Operating systems
- Cryptography
- Cyber forensics
- Investigation
- Cloud security
- Penetration testing
- Wireless and mobile security
- Incident response techniques

PROGRAM POLICIES AND PROCEDURES

RIGHTS AND RESPONSIBILITIES

All faculty and staff have the right to:

- An educational environment free of racist or sexist stereotyping, discrimination or harassment in the classroom (either physical or virtual) and in all College service areas.
- Expect appropriate student behaviour and have the right to request that a student exhibiting disruptive and/or disrespectful behaviour leave the classroom, laboratory or practicum area.
- Expect to be informed immediately of any issues, problems or concerns related to the program.

All faculty are required to:

- Provide written course documentation at the beginning of each course which includes outcomes, objectives, methodology, required resources, an evaluation system and penalties applied if expectations or due dates are not met.
- Provide notice in writing of any substantial changes to course requirements and the reason(s) for these changes.
- Set deadlines for assigned work, to expect assignments to be submitted at specific times and to impose equitable, established penalties when students fail to meet the deadlines or expectations.
- Carry out regularly scheduled instruction, and provide academic counselling for students at other times.

LOYALIST'S VIOLENCE PREVENTION POLICY

- All College members have a responsibility to

foster a climate of respect and safety, free from violent behavior and harassment.

- Violence (physical violence, threatening actions or harassment) is not, in any way, acceptable behaviour.
- Weapons or replicas of weapons are not permitted on Loyalist College property.
- Unacceptable behaviour will result in disciplinary action or appropriate sanctions.
- More information can be found in the [Student Code of Conduct – Positive Learning & Living Environment \(AOP 209\)](#).

ATTENDANCE

Each faculty member has different expectations regarding attendance, but we all agree that there is a direct relationship between academic success and attendance in class. You can demonstrate your commitment to your chosen profession by attending all your classes. The skills and knowledge that you will acquire in the program build upon each other. Class discussions and team projects are a key part of your learning journey. It is the student's responsibility to inform the faculty member (by email) of their absence before the beginning of class.

CLASSROOM EXPECTATIONS

In business, time is money. You are paying to attend class and if you play an active role, you will receive the best value for your tuition. Professional attitudes are developed in class by:

- **Demonstrating respect for self, others and your environment.**
- **Turning off your cellphone.**

- **Refraining from texting.**
- **Refraining from watching movies and YouTube.**
- **Being engaged in the class and encouraging others to do the same.**

Here are some examples of inappropriate and unethical behaviour:

Cheating: transferring or receiving information without the permission of the faculty member for the purpose of achieving grades. This includes copying from the work of another person or permitting such copying to take place during a test or using unauthorized notes or other memory aides.

Plagiarism: submitting work that is substantially copied from the work of another person and representing that work as original.

Falsification: modifying an examination paper, record, or assignment for the purpose of obtaining additional credits or a higher grade.

Misrepresentation: knowingly giving false information about facts or actions in order to gain admission to the College or to fulfill academic requirements.

Fraudulent Behaviour: knowingly misleading another person for purposes of gain and thereby causing actual harm to another person or assisting in such activity.

PLAGIARISM AND ACADEMIC DISHONESTY

Plagiarism is the act of collecting and passing off the writing, passages or ideas of another author as your own. Students are plagiarizing if they fail to give credit, through referencing, to the person or work that originated the idea or reference.

Following a discussion with faculty, a mandatory failing grade will be issued on the assignment. A failing grade is the minimum penalty, but the College may reserve the right to impose a full range of sanctions including suspension or expulsion.

Academic dishonesty is obtaining academic grades by deceit. This includes the use of concealed notes or materials during a test/examination, acquiring information from other students by looking at their test papers, talking/signaling other students during tests, or by using another person's work in any form without citing

references appropriately.

A student found guilty of obtaining grades in this manner will automatically be assigned a zero for the test/exam. A repeat offence may result in suspension from the program.

Please see the [Academic Integrity Policy \(AOP 216\)](#) for more information.

PRIOR LEARNING ASSESSMENT AND RECOGNITION (PLAR)

PLAR is a process that involves the identification, documentation, assessment and recognition of learning acquired through informal means. This may include work and life experience, informal education and training, independent study, volunteering, travel, hobbies and family experiences.

Students with significant life or work experience can request the opportunity to PLAR an academic course if they feel they have acquired most or all of the learning outcomes of the course from experiences elsewhere. A fee will be charged per course for assessment of prior learning (please refer to current College fee structure) and students may not PLAR more than 75% of program requirements.

Please see the [Prior Learning Assessment and Recognition, Transfer Credit, Articulation and Exemption Policy \(AOP 221\)](#) for more information.

TRANSFER/ARTICULATION AGREEMENTS

Explore [transfer credit options and articulation agreements](#).

CO-OP INFORMATION

Industry co-op allows the student to gain professional experience in the related field prior to graduation and it is organized and planned by the student with support from the faculty.

A co-op work term in semester four provides an opportunity to gain first-hand workplace experience in the industry.

CO-OP PLACEMENT

Co-op is a work integrated experience built into post-secondary programs to allow you to get hands on experience in your field of study while applying your academic studies. The integration of formal learning practices with developmental learning opportunities helps to enhance and consolidate the knowledge, skills, abilities, and behaviours of emerging professionals. This is also an opportunity to interact and demonstrate your skills to potential employers.

APPLIED INDUSTRY PROJECT

Under extraordinary circumstances some students are not eligible for Co-op and may be able to complete the Applied Industry Project. Students wishing to pursue the Applied Industry Project must seek approval from:

Florian Vauleon

Director of Academics & Quality Assurance
Room 109, Ext. 275
florian.vauleon@tbcollege.com

Applied Industry Project involves a simulation experience involving the integration of formal learning practices with developmental learning opportunities helps to enhance and consolidate the knowledge, skills, abilities, and behaviours of emerging professionals. The industry project will be performed on the College campus under the guidance of the College faculty. Students will attend college five days weekly.

GUIDE TO SAFETY DURING PLACEMENT

Basic steps in risk awareness:

- Identify potential risks. Talk to your faculty supervisor and placement supervisor about risk related to your field.
- Understand the guidelines/expectations from the College and placement host.
- Inform your faculty supervisor or placement supervisor of any concerns.

Should an incident occur:

- Be sure to document all facts such as date, time, persons involved and the situation as you observed it.
- Inform your faculty supervisor or placement supervisor immediately.

EXAMPLES OF SAFETY RISKS

Harassment

- Sexual, age, ethnic, racial, or disability harassment of student workers or any employee is illegal.
- The employer must ensure that current full-time employees or interns do not harass student workers.
- Immediately report any harassment to your faculty supervisor.
- Resolution may include placing the student in another position.
- Harassment of others in the workplace may result in your dismissal from the program.

Protect Your Personal Identity

- Protect Social Insurance Number, cellphone numbers and all other personal identification.

Sexual Assault

There are several ways to reduce the risk of becoming a victim of sexual assault:

- Set limits; don't send the wrong message.
- Use your better judgment about situations to avoid.
- Be clear and responsible in your communication with others.
- If necessary, be forceful, firm and assertive in your communication with others.
- Be aware of nonverbal cues that can alert you to a problem. Remember, silence is not consent.
- Don't assume the other person knows what you do or do not want.
- Use the buddy system.
- Avoid secluded places.
- Devise an action plan in advance for what you will do if confronted with a situation of possible sexual assault. Remove yourself from the situation at the first sign that you are feeling unsafe.
- Familiarize yourself with the idea that you might have to be aggressive or yell to remove yourself from a possible sexual assault situation.

Travel

- Consider dangerous intersections, streets, or stretches of highway to and from the site
- Notice parking garages or poorly-lit parking areas
- When using your car or a vehicle provided to you by your placement site, find out all policies regarding travel such as:
 - Reimbursement of funds personally expended.
 - Transporting clients.
 - Transporting sensitive or easily-damaged materials.
 - Transporting potentially hazardous materials.

Physical Hazards

- Working outdoors – sun, snow and ice and other extreme weather, pollution, power-lines, pipelines, electromagnetic radiation, or gas leaks.

- Working indoors – any type of machinery, or unsuitable working conditions such as extreme temperatures, asbestos, sick building odors, buildings with structural concerns, or blocked fire escapes

Biological Hazards

- Animals you may work with (deceased or living).
- Poisonous plants.
- Diseased birds or fish.

If in the medical field, check to see how bio-hazardous waste is disposed (e.g. sharp container).

Chemical Hazards

- Water supply.
- Toner powders from laser printer cartridges or photocopies that may cause eye or lung irritation.
- Chemicals in a laboratory setting getting in eyes, open sores, or lungs.

PROGRAM LEARNING OBJECTIVES

COMPUTER SOFTWARE AND DATABASE DEVELOPMENT

Two-Year Post-Graduate Certificate

At the end of the program, students will be able to:

1. Develop and implement cyber security solutions considering requirements analysis to protect the organization from internal and external threats.
2. Implement and evaluate security solutions for business processes, applications and communications to protect business resources and respond to the needs of all the internal stakeholders.
3. Recommend security controls for the maintenance and deployment of cyber security solutions to protect systems and information.
4. Evaluate and recommend defensive programming and cyber security strategies that protect organizational processes and applications.
5. Design and implement cyber security solutions in compliance with the current security policies, ethical standards, and industry regulations.
6. Plan, implement, and evaluate cyber security policies and strategies using project management principles to effectively respond to the needs of the organization's information security requirements.
7. Optimize the effectiveness of the information security in a business environment through risk mitigation and auditing of information systems.
8. Communicate security policies and audit results and related documentation to any level of the organization.
9. Design and implement vulnerability assessment procedures to find and solve existing security issues in a network through monitoring and analyzing different attackers' tactics, strategies and techniques.

SMALL GIVES US THE POWER TO DO BIG THINGS

In a world obsessed with big, we are small. Small gives us the power to do big things.

And things that make a big difference to our students, community, and partners.

In an impersonal world of big lecture halls and stadium seating, we know our students by name and circumstance. Small frees us to provide personal one-on-one attention, in small classes and learning environments.

Small means our students feel like they matter. That they belong. That they are no longer invisible in a world which had passed them by.

Small means that we can move mountains to help every student succeed, confident in who they are and what they are capable of becoming.

We are Loyalist College of Applied Arts and Technology.

We are small.

LOYALIST Of Applied Arts
COLLEGE & Technology

GENERAL EDUCATION ELECTIVES

What Is General Education?

General Education (GNED) electives give you the opportunity to explore a topic that interests you. The elective must be outside the vocational outcomes of your program and will provide a general overview of a topic.

The Ministry of Colleges and Universities requires all students in diploma and advanced diploma programs to successfully complete a minimum of three GNED electives to graduate. According to the Framework for Programs of Instruction, "General Education strengthens student's generic skills, such as critical analysis, problem solving, and communication, in the context of an exploration of topics with broad-based personal and/or societal importance" (Framework for Programs of Instruction, Revised July 2009, p. 21).

Note: Should you neglect to complete three GNED electives during your program of study in the semesters determined by your program you will be required to make these up at an additional cost in order to graduate.

Courses

Theme - Arts in Society

GNED1005 Expression Through Art

You will explore the concepts of visual art aesthetics, art's origins, and its significant impact on society both past and present, the various genres of art, and how they shaped the world at large. You will scrutinize the contemporary art scene and draw conclusions about its political and social implications now and in the future.

The following are the types of evaluations used in GNED 1005 Expression Through Art:

- In-class learning assignments
- Various art medium exploration
- Artist biography study
- Genres of art exploration
- Indigenous Art exploration
- Independent Study Assignment
- LinkedIn Learning module
- Tour or virtual tour of local galleries

GNED1044 Film Club

Students will be introduced to the history and fundamental concepts of cinema. By using selected screenings, students will analyze the importance of story structure, visual techniques, and significant directors. Students will also discuss how film can be culturally influential and what makes a film stand the test of time.

The following are the types of evaluations used in GNED 1044 Film Club:

- Class Discussions – various film topics
- Quizzes – film history and terminology
- Written Assignment – storytelling or technical elements
- Group Debate – greatest film contribution
- Independent Study Assignment
- Canvas Thematic Module

GNED1050 The Power of Photography

We live in a celebrity culture. The impact of celebrity extends to all avenues of society—politics, sports, entertainment, activism, the law. Explore the sociology and power of celebrity to change public attitudes. Examine celebrity influence on such things as consumer behavior, gender roles, race, and interactions in a pop-culture world.

The following are the types of evaluations used in GNED 1050 Photos that Changed the World:

- Written Reflections
- Written Analysis
- Timeline Assignment
- Class Discussions
- In-Class Assignments
- In-Class Presentations
- Canvas Thematic Module

Theme - Civic Life

GNED1018 Political Foundations: Governance, Engagement, and Activism

This course is designed to introduce students to the grass-roots components of a community and to civic life. The components include aspects of citizenship and participation, volunteerism and the fabric of both political and cultural organizations at all levels of the municipal, provincial and federal systems.

The following are the types of evaluations used in GNED 1018 Community & Civic Life:

- Group Presentation
- Online Discussion Forum
- Report on Approved Current Political Issue
- Individual Reflection
- Professionalism & Participation
- Independent Study Assignment
- Canvas Thematic Module

GNED1045 Social Media, Your Voice and Digital Reputations

Students will understand the effect that all forms of media have on their daily lives and review how they represent themselves digitally. They will learn how they are influenced by media, and the benefits and dangers of a media-intense society. This course is designed to help students develop an informed and critical understanding of the nature of an ever-expanding and increasingly dominating mass media – as information sources, as entertainment, and as an industry. Students will also investigate how social media can both support and hinder social activism campaigns, politics, and consumerism.

The following are the types of evaluations used in GNED 1045 Social Media, Your Voice and Digital Reputations:

- 3 Assignments – Social media reflection, would you hire yourself and a day without social media
- Quiz
- Discussions and Surveys
- Independent Study Assignment
- Canvas Thematic Module

Theme - Social and Cultural Understanding

GNED1100 Becoming a Global Changemaker

This Loyalist College graduate attributes course will help shape your perspectives, broaden your understanding of important issues affecting our societies today, and equip you with invaluable knowledge and skills that will inform your ability to influence your community in a meaningful and impactful way. By exploring topics such as cultural competency, Indigenous education, entrepreneurship, sustainability, health and wellness, and ecological literacy, you'll be equipped with a powerful toolkit that extends far beyond the classroom.

GNED1024 Diversity

In this course students critically identify and examine issues in diversity. Specifically, students focus on topics pertaining to inequality in various social settings, including but not limited to: race, gender, ethnicity, class and sexual orientation. Incorporating social/legal explanations of diversity, students develop a clear understanding of the impacted groups and possible strategies of community empowerment.

The following are the types of evaluations used in GNED 1024 Diversity:

- In-Class Assignments
- Guided Reflections
- Research Assignment
- Presentation
- Independent Study Assignment
- Canvas Thematic Module

Theme - Personal Understanding

GNED1058 Building Personal Resiliency

In this elective, you will build resiliency strategies and develop tools to help you cope with some of life's challenges. You will research and practice proven strategies for coping and managing your emotions when facing stressful situations.

GNED1025 Goals & Motivation

This course takes an in-depth look at goal setting and achieving. Students will reflect on their personal goals, motivators, and actions needed to help attain their goals. Students will develop resources and learn about strategies for their own goals and motivation toolkit.

The following are the types of evaluations used in GNED 1025 Goals & Motivation:

- Professionalism & Participation
- Weekly Reflections
- Presentations
- Independent Study Assignment
- Canvas Thematic Module

GNED1023 Wellness

What we eat, how we move and how we manage stress all have profound effects on our lives and our learning. Wellness explores the basics of physical, emotional and spiritual health and the importance of balancing these areas. Healthy nutrition and lifestyle activities will be discussed, practical stress-management techniques will be demonstrated and spiritual connections to our creativity are explored. Students will take part in a variety of exercises in a friendly environment.

The following are the types of evaluations used in GNED 1023 Wellness:

- Take-home Assignment
- Group Assignment
- Essay
- Quiz
- Design a Pamphlet
- Independent Study Assignment
- Canvas Thematic Module

GNED1017 Building Your Professional Identity

This course provides students with the opportunity to learn and experience the key critical success factors related to employer expectations for successful workplace attitude and behavior. Based on extensive workplace and employer research, students can not only understand but to practice the key elements of human inter-relational skills. The changing workplace demands employees who can demonstrate that they possess the knowledge, skill, ability, attitude, and behavior which contributes to personal and professional workplace success.

The following are the types of evaluations used in GNED 1017 Pathway to Employment Success:

- In-Class Discussions and Assignments
- Assignments/Projects
- Group Work
- Quizzes
- Independent Study Assignment
- Canvas Thematic Module

GNED1009 Freelance & Entrepreneurship

Students become familiar with freelancing and small business development, as well as the contributions of both entities to Canadian society.

The following are the types of evaluations used in GNED 1009 Freelance & Entrepreneurship:

- Guest Speaker Reflections
- Quizzes
- Group Presentation – Canadian entrepreneur
- Independent Study Assignment
- Canvas Thematic Module

Theme - Science and Technology

GNED1052 Technology's Impact on the Modern World

This course explores new and emerging technologies and their implications for individuals, society, and the global community. Students will be introduced to issues like identity performance, environment technology, the gamification of life and artificial versus augmented realities.

The following are the types of evaluations used in GNED 1052 Technology's Impact on the Modern World:

- Discussion Boards
- In-Class Discussions and Activities
- Quizzes
- Assignments
- Independent Study Unit
- Canvas Thematic Module

Exam Rules of Engagement

Procedure Number: TPR 001 – AC 003

Issue Date: August 26, 2022

Last Review: October 3, 2023

Last Revision: June 7, 2024

Overseer: TBC Senior Leadership Team

Next QA Review: October 3, 2024

Author's Name: Roni SRDIC

Author's Title: Director of Enrollment Services

1. Statement

This procedure outlines the rules of conduct for examinations.

2. Exams (midterm and final assessments)

Before the exam

- Students must come to class for their regular time.
- Students must be seated, and all bags, phones, smart watches, or ear buds placed at the front of the room.
- Students must turn off all ringers, alarms, and other notifications on their phone before the start of the exam.
- Unauthorized devices and aids are not permitted on the desks and must be placed with other belongings at the front of the room. The following devices and aids are not allowed during an exam.
 - Mobile phones, smartwatches, fitness trackers, or other wearable technology (smart glasses)
 - Audio players or recorders, tablets, laptops, notebooks
 - Bluetooth devices (such as wireless earbuds/headphones), or any other personal computing devices
 - Separate timers of any type

- Online calculators
- If proctors see any of the devices above, students will be required to leave the exam immediately. Students will receive a grade of “0” and will be reported for academic misconduct.

Late Arrival

- Students and the instructor/proctor must be present at the beginning of the scheduled class period. The instructor/proctor will use the first 30 minutes to get the class settled, make sure the desks are cleared.
- As soon as the exam has started, students cannot enter the classroom to write the exam, and they will get a grade of 0.
- No student may enter if another has already left the classroom.

During the exam

- Lockdown browser is mandatory.
- Students are not allowed to leave the exam in the first AND the last 15 minutes of the exam.
- Students will not have any break during the exam.
- If students leave the classroom after the start of the exam for any reason they cannot return to the classroom.
- Absolutely no talking will be tolerated during the exam, even if a student is talking to themselves.
- Anyone talking will be given a grade of 0 and reported for academic misconduct.

If students finish early

- If students finish early and wish to leave the exam, they should raise their hand.
- Students should wait until the proctor allows them to leave.
- Absolutely no talking when students leave. Anyone talking will be given a grade of 0 and reported for academic misconduct.

3. Proctoring process

1. The course instructor is the primary proctor for all midterms, exams, and other assessments.
2. Instructor may request additional proctoring support for exams using [the proctoring assistance request form](#). The Academic Department will try to accommodate all requests to the best of their abilities.
3. Secondary proctor duties:
 - a. Secondary proctors will make sure the faculty has been informed before entering the classroom.
 - b. Any issues identified by the secondary proctor will have to be reported to the faculty first.
 - c. Secondary proctor must use discretion when discussing student issues with faculty.

4. Exams will start after reading the Exam Rules for Engagement, putting phones away, bags at front of room, etc.
5. Students seated and all bags/phones/smart watches/ear buds placed at the front of the room.
6. Exams are distributed face down – if paper
 - a. Alternating with different versions of exam.
 - b. Exam is not started until students are settled and the proctor is satisfied that all electronics have been removed.
7. The proctor reads the “exam rules.”
8. Start and end time of exam noted on white board.
9. The proctor gives a 15-minute warning before the end of the exam.
10. Exam attendance information is kept in the Academic office and database for any appeals, confirmations of attendance, etc.
11. For students who leave/finish the exam early, proctor/instructor must confirm that the student has “submitted” the exam before leaving exam.

4. Definition of open book exam

- Open Book exam allows for study notes and/or textbooks.
- Does not include laptop or accessing internet/web/electronic notes or online calculators.
- Lockdown browser is mandatory.

5. Personal laptops vs desktops in computer labs

No personal laptops in classrooms with desktops

If there are enough desktops for all students. Only use laptops at the tables with no desktops. Laptops must have a lockdown browser installed.

The following devices and aids are not allowed during an exam:

- Mobile phones, smartwatches, fitness trackers, or other wearable technology (smart glasses)
- Audio players or recorders, tablets, laptops, notebooks,
- Bluetooth devices (such as wireless earbuds/headphones), or any other personal computing devices
- Separate timers of any type
- Online calculators
- Unauthorized devices and aids are not permitted at desks and must be placed with other belongings at the front of the room.

Absolutely no talking will be tolerated during the exam, even if a student is talking to themselves.

6. Announcement

Announcement to be read before every exam by the instructor/proctor and projected onto the screen in the classroom:

EXAM RULES OF ENGAGEMENT

As a reminder, instructor/proctor will read the exam rules below before every exam display the following Exam Rules of Engagement on the screen in the classroom:

- Place all book bags and accessories at the front of the class.
- You are only allowed water in the room.
- Remove and place all phones, smart watches, ear buds away and completely out of sight and phones put on silent mode.
- If we see any of these devices, you will be required to leave the exam immediately, you will receive a grade of “0” and you will be reported for academic misconduct.
- The proctor or the instructor takes the student information and reports the Breach of Academic Integrity to the College.

Announcements:

1. Type of exam:
 - a. Open book – if an option
 - b. Lockdown Browser
 - c. Paper
 - d. Other rules for this exam around use of other devices/equipment
2. **Absolutely no talking to your neighbours or to yourself during the exam**
 - Anyone talking will be given a grade of “0” and will be reported for academic misconduct.
3. Students are not allowed to leave the exam in the first AND the last 15 minutes of the exam.
4. Students will not have any break during the exam.
5. If students leave the classroom after the start of the exam for any reason, they cannot return to the classroom.
6. Instructors will give specific instructions about the exam:
 - Students are not permitted to ask questions about the exam during the exam.
 - Students can ask questions during this set-up period but not during the exam.
7. Exam does not start until everyone stops talking and the desk and spaces are clear of items not authorized during the exam.
8. Leave space at the front of the room for any latecomers to limit distractions.

7. Message sent to students via email and posted on Moodle:

Dear students,

Available in Alternate Formats Upon Request

Final exams are coming up. We trust you are working hard and have started studying. Please note the rules of engagement for the final exams.

You **MUST**:

- Arrive on time and stay in the classroom.
- Place all book bags and accessories at the front of the class.
- Place your coat/jacket on the back of your chair.
- You must turn off all ringers, alarms, and other notifications on your phone before the start of the exam.
- Remove and place all phones, smart watches, ear buds, and all other devices, in your bag or out of sight.

You **WILL**:

- NOT be allowed to eat or drink anything except water during the exam.
- NOT be allowed to return to the exam room if you leave for any reason during the exam.
- NOT be allowed to leave the exam in the first and last 15 minutes of the exam.
- NOT talk to your neighbours or yourself.

If you are late for your exam, you will get a grade of “0”

Any act of academic dishonesty will result in a grade of “0” for the exam. Academic dishonesty includes a variety of actions including, but not limited to, plagiarism, conflict of interest, cheating, falsification, misrepresentation and fraudulent behaviour, and copyright breaches.

Loyalist College in Toronto will penalize acts that demonstrate disregard for the standards of academic integrity:

1. First documented offence will result in a grade of zero on any material that can be demonstrated to be dishonest.
2. Second documented offence will result in a grade of zero for the course.
3. Third documented offence will result in suspension from the College for one calendar year (two academic terms).
4. Fourth documented offence will result in permanent expulsion (debarment) from the College.

PROGRAM LEARNING OBJECTIVES

WELCOME

TO THE CLOUD COMPUTING PROGRAM

If you are serious about pursuing a career in Cloud Computing, you've made the right choice in selecting Loyalist College. Our faculty works alongside you to aid in your success for wherever your career path may lead.

The intention of this program manual is to:

1. Explain the full range of services we offer in the Cloud Computing program to support your success;
2. Highlight the program's assortment of courses and learning experiences; and,
3. Clarify our expectations of you, and your expectations of us.

WHY CHOOSE CLOUD COMPUTING?

Gain the specialized skills and knowledge needed for a career working in today's multi-vendor cloud infrastructure. Through hands-on training, learn how to tackle the business challenges of cloud architecture and the flexibility of cloud computing.

Cloud computing professionals work with a range of companies to design and deploy cloud computing architecture systems.

Graduates of this program will have the specialized skills needed to:

- Design and deploy new cloud computing architecture and systems.
- Recommend optimal strategies to migrate legacy systems into the cloud environment.
- Design and implement applications that support web services, databases, automation and security processes.
- Develop test methods to analyze the effectiveness of enterprise cloud solutions to provide recommendations for improvement.

REQUIRED LAPTOP SPECIFICATIONS

We recommend that each student have a personal laptop. Students have access to all software that is part of their program of study on their personal computer. This tool will allow you to take advantage of your learning anywhere and at any time. Below are the suggested minimum standards for your device:

Minimum Requirements:

RAM: 8 GB

CPU: i5 Intel processor

HDD: 512 GB HDD

Recommended Requirements:

RAM: 16 GB

CPU: i7 Intel processor

HDD: 256 GB SSD or 512 GB HDD

HOURS OF OPERATION

Student Access Lab in the Library

Hours of Operation during the Academic Year*

- Monday to Saturday: 8 am – 9 pm
- Closed on Sundays and statutory holidays

HOW TO CONTACT US

College staff can be reached in person, by phone, or email through the contact information listed within the Program Contacts section of this program manual. Please note that all email communication must be sent and received through your Loyalist College email account.

Students are responsible for regularly checking their Loyalist email account and Learning Management System (LMS) for communication from faculty regarding program or course-specific information.

STUDENT SERVICES

Student Success is the central point of access to many of the services available to support your academic success. Services include program advising and guidance, accessible academic accommodations, personal counselling, peer tutoring, writing support, and culturally responsive services for Indigenous and international students. Staff can also help you navigate College policies, explore bursary and grant options, provide referrals, and partner with you in seeking solutions.

STUDENT RESPONSIBILITIES – REGISTRATION AND ACCOUNT

Please note: Program and course-specific requirements are subject to change. It is each student's responsibility to ensure they are registered in the appropriate course to fulfill the requirements of their program and to be aware of all applicable progression requirements.

Students must ensure that they are registered in all courses they are attending, and that courses which they are not attending are removed from their academic record. It is the student's responsibility to ensure their registration record and course schedule is accurate prior to the registration and withdrawal deadlines noted on the [Academic Calendar](#).

Students are responsible for remaining in good financial standing and resolving all holds placed on their account.

Please contact Enrollment Services with any questions or concerns regarding course enrollment, graduation, group selection, updating academic progression, payment and fees. Enrollment Services can be reached at registration@tbcollege.com Regular office hours are Monday to Friday 8 am to 5 pm.

All Human Rights Code related requests for accommodation will be given meaningful consideration.

PROGRAM POLICIES AND PROCEDURES

RIGHTS AND RESPONSIBILITIES

All faculty and staff have the right to:

- An educational environment free of racist or sexist stereotyping, discrimination or harassment in the classroom (either physical or virtual) and in all College service areas.
- Expect appropriate student behaviour and have the right to request that a student exhibiting disruptive and/or disrespectful behaviour leave the classroom, laboratory or practicum area.
- Expect to be informed immediately of any issues, problems or concerns related to the program.

All faculty are required to:

- Provide written course documentation at the beginning of each course which includes outcomes, objectives, methodology, required resources, an evaluation system and penalties applied if expectations or due dates are not met.
- Provide notice in writing of any substantial changes to course requirements and the reason(s) for these changes.
- Set deadlines for assigned work, to expect assignments to be submitted at specific times and to impose equitable, established penalties when students fail to meet the deadlines or expectations.
- Carry out regularly scheduled instruction, and provide academic counselling for students at other times.

LOYALIST'S VIOLENCE PREVENTION POLICY

- All College members have a responsibility to

foster a climate of respect and safety, free from violent behavior and harassment.

- Violence (physical violence, threatening actions or harassment) is not, in any way, acceptable behaviour.
- Weapons or replicas of weapons are not permitted on Loyalist College property.
- Unacceptable behaviour will result in disciplinary action or appropriate sanctions.
- More information can be found in the [Student Code of Conduct – Positive Learning & Living Environment \(AOP 209\)](#).

ATTENDANCE

Each faculty member has different expectations regarding attendance, but we all agree that there is a direct relationship between academic success and attendance in class. You can demonstrate your commitment to your chosen profession by attending all your classes. The skills and knowledge that you will acquire in the program build upon each other. Class discussions and team projects are a key part of your learning journey. It is the student's responsibility to inform the faculty member (by email) of their absence before the beginning of class.

CLASSROOM EXPECTATIONS

In business, time is money. You are paying to attend class and if you play an active role, you will receive the best value for your tuition. Professional attitudes are developed in class by:

- **Demonstrating respect for self, others and your environment.**
- **Turning off your cellphone.**

- **Refraining from texting.**
- **Refraining from watching movies and YouTube.**
- **Being engaged in the class and encouraging others to do the same.**

Here are some examples of inappropriate and unethical behaviour:

Cheating: transferring or receiving information without the permission of the faculty member for the purpose of achieving grades. This includes copying from the work of another person or permitting such copying to take place during a test or using unauthorized notes or other memory aides.

Plagiarism: submitting work that is substantially copied from the work of another person and representing that work as original.

Falsification: modifying an examination paper, record, or assignment for the purpose of obtaining additional credits or a higher grade.

Misrepresentation: knowingly giving false information about facts or actions in order to gain admission to the College or to fulfill academic requirements.

Fraudulent Behaviour: knowingly misleading another person for purposes of gain and thereby causing actual harm to another person or assisting in such activity.

PLAGIARISM AND ACADEMIC DISHONESTY

Plagiarism is the act of collecting and passing off the writing, passages or ideas of another author as your own. Students are plagiarizing if they fail to give credit, through referencing, to the person or work that originated the idea or reference.

Following a discussion with faculty, a mandatory failing grade will be issued on the assignment. A failing grade is the minimum penalty, but the College may reserve the right to impose a full range of sanctions including suspension or expulsion.

Academic dishonesty is obtaining academic grades by deceit. This includes the use of concealed notes or materials during a test/examination, acquiring information from other students by looking at their test papers, talking/signaling other students during tests, or by using another person's work in any form without citing

references appropriately.

A student found guilty of obtaining grades in this manner will automatically be assigned a zero for the test/exam. A repeat offence may result in suspension from the program.

Please see the [Academic Integrity Policy \(AOP 216\)](#) for more information.

PRIOR LEARNING ASSESSMENT AND RECOGNITION (PLAR)

PLAR is a process that involves the identification, documentation, assessment and recognition of learning acquired through informal means. This may include work and life experience, informal education and training, independent study, volunteering, travel, hobbies and family experiences.

Students with significant life or work experience can request the opportunity to PLAR an academic course if they feel they have acquired most or all of the learning outcomes of the course from experiences elsewhere. A fee will be charged per course for assessment of prior learning (please refer to current College fee structure) and students may not PLAR more than 75% of program requirements.

Please see the [Prior Learning Assessment and Recognition, Transfer Credit, Articulation and Exemption Policy \(AOP 221\)](#) for more information.

TRANSFER/ARTICULATION AGREEMENTS

Explore [transfer credit options and articulation agreements](#).

CO-OP INFORMATION

Industry co-op allows the student to gain professional experience in the related field prior to graduation and it is organized and planned by the student with support from the faculty.

A co-op work term in semester four provides an opportunity to gain first-hand workplace experience in the industry.

CO-OP PLACEMENT

Co-op is a work integrated experience built into post-secondary programs to allow you to get hands on experience in your field of study while applying your academic studies. The integration of formal learning practices with developmental learning opportunities helps to enhance and consolidate the knowledge, skills, abilities, and behaviours of emerging professionals. This is also an opportunity to interact and demonstrate your skills to potential employers.

APPLIED INDUSTRY PROJECT

Under extraordinary circumstances some students are not eligible for Co-op and may be able to complete the Applied Industry Project. Students wishing to pursue the Applied Industry Project must seek approval from:

Florian Vauleon

Director of Academics & Quality Assurance
Room 109, Ext. 275
florian.vauleon@tbcollege.com

Applied Industry Project involves a simulation experience involving the integration of formal learning practices with developmental learning opportunities helps to enhance and consolidate the knowledge, skills, abilities, and behaviours of emerging professionals. The industry project will be performed on the College campus under the guidance of the College faculty. Students will attend college five days weekly.

GUIDE TO SAFETY DURING PLACEMENT

Basic steps in risk awareness:

- Identify potential risks. Talk to your faculty supervisor and placement supervisor about risk related to your field.
- Understand the guidelines/expectations from the College and placement host.
- Inform your faculty supervisor or placement supervisor of any concerns.

Should an incident occur:

- Be sure to document all facts such as date, time, persons involved and the situation as you observed it.
- Inform your faculty supervisor or placement supervisor immediately.

EXAMPLES OF SAFETY RISKS

Harassment

- Sexual, age, ethnic, racial, or disability harassment of student workers or any employee is illegal.
- The employer must ensure that current full-time employees or interns do not harass student workers.
- Immediately report any harassment to your faculty supervisor.
- Resolution may include placing the student in another position.
- Harassment of others in the workplace may result in your dismissal from the program.

Protect Your Personal Identity

- Protect Social Insurance Number, cellphone numbers and all other personal identification.

Sexual Assault

There are several ways to reduce the risk of becoming a victim of sexual assault:

- Set limits; don't send the wrong message.
- Use your better judgment about situations to avoid.
- Be clear and responsible in your communication with others.
- If necessary, be forceful, firm and assertive in your communication with others.
- Be aware of nonverbal cues that can alert you to a problem. Remember, silence is not consent.
- Don't assume the other person knows what you do or do not want.
- Use the buddy system.
- Avoid secluded places.
- Devise an action plan in advance for what you will do if confronted with a situation of possible sexual assault. Remove yourself from the situation at the first sign that you are feeling unsafe.
- Familiarize yourself with the idea that you might have to be aggressive or yell to remove yourself from a possible sexual assault situation.

Travel

- Consider dangerous intersections, streets, or stretches of highway to and from the site
- Notice parking garages or poorly-lit parking areas
- When using your car or a vehicle provided to you by your placement site, find out all policies regarding travel such as:
 - Reimbursement of funds personally expended.
 - Transporting clients.
 - Transporting sensitive or easily-damaged materials.
 - Transporting potentially hazardous materials.

Physical Hazards

- Working outdoors – sun, snow and ice and other extreme weather, pollution, power-lines, pipelines, electromagnetic radiation, or gas leaks.

- Working indoors – any type of machinery, or unsuitable working conditions such as extreme temperatures, asbestos, sick building odors, buildings with structural concerns, or blocked fire escapes

Biological Hazards

- Animals you may work with (deceased or living).
- Poisonous plants.
- Diseased birds or fish.

If in the medical field, check to see how bio-hazardous waste is disposed (e.g. sharp container).

Chemical Hazards

- Water supply.
- Toner powders from laser printer cartridges or photocopies that may cause eye or lung irritation.
- Chemicals in a laboratory setting getting in eyes, open sores, or lungs.

PROGRAM LEARNING OBJECTIVES

CLOUD COMPUTING

Two-Year Post-Graduate Certificate

At the end of the program, students will be able to:

1. Create secure solutions that support highly available micro-services that meet client needs.
2. Implement enterprise level applications in hosted cloud environments that respond to client needs and business practices.
3. Architect and deploy fault tolerant solutions within cloud computing platforms to solve identified business requirements.
4. Automate security and resources for applications by using cloud computing tools to mitigate risk for organizations and protect assets.
5. Design and test code-based solutions to cloud computing problems that ensure security in depth.
6. Assess the viability of developing, deploying, maintaining and securing cloud computing solutions using a variety of resiliency testing tools.
7. Create and defend cloud-computing strategies used to solve identified business needs on behalf of a client.

SMALL GIVES US THE POWER TO DO BIG THINGS

In a world obsessed with big, we are small. Small gives us the power to do big things.

And things that make a big difference to our students, community, and partners.

In an impersonal world of big lecture halls and stadium seating, we know our students by name and circumstance. Small frees us to provide personal one-on-one attention, in small classes and learning environments.

Small means our students feel like they matter. That they belong. That they are no longer invisible in a world which had passed them by.

Small means that we can move mountains to help every student succeed, confident in who they are and what they are capable of becoming.

We are Loyalist College of Applied Arts and Technology.

We are small.

LOYALIST Of Applied Arts
COLLEGE & Technology
